

Profile

Open-E is a pioneering leader and developer of IP-based storage software providing complete data management solutions (NAS and SAN), and including support for iSCSI, Infiniband, NFS or Fibre Channel storage access.

The company's flagship product - Open-E® DSS V7™ and its free version Open-E® DSS V7 Lite™ - is a robust, award-winning enterprise storage application which offers excellent compatibility with industry standards, supports various hardware setups and is easy to use and manage. Additionally, Open-E DSS V7 is one of the most stable and secure solutions on the market, helping organizations to implement high-performing, yet cost-effective, data storage systems.

Open-E counts for over 27,000 installations worldwide and received numerous industry awards and recognition from PC Professional, Tom's Hardware, Storage Awards, PC Pro and more.

Thanks to the company's reputation, experience and business reliability, Open-E is an esteemed technological partner for industry-leading IT companies, such as Citrix, Intel, LSI, VMware, and Adaptec.

Partner Program

Open-E has established a special Partner Program to offer knowledge resources, professional trainings, promotion materials, services and experienced technical support to partners. Significant investments have been made in Channel Sales, Technical Support and Marketing teams, in order to provide partners with on-demand service to help them sell and support Open-E storage solutions.

Partners can also take advantage of Open-E's services and certify their hardware with the Open-E Certified Storage Server program, become an Open-E Certified Engineer or an Open-E Certified Sales Professional.

Open-E's Partner Program provides partners with storage software solutions and services that are unbeatable in terms of price and performance.

Excellence can be achieved at a lower price point and a higher margin. Open-E is a partner you can trust to help grow your market position.

For more information about the Open-E Partner Program go to: <http://www.open-e.com/partners/partner-program/>

Partners

With an extensive worldwide network of registered resellers, OEMs and system integrators certified as **Open-E Authorized, Silver and Gold Partners**, customers have the flexibility to work with the hardware provider of their choosing, allowing Open-E to focus on its core competency of storage software development.
